# Anti-Malware

## About Product

Think IT's Managed Anti-Malware solution provides real time, continuous, seven layered security scanning technology to stop zero day attacks such as ransomware from penetrating your organisation primarily.

### Prevent more threats from breaching your end points:

- ✓ Designed for Workstations, Laptops and Servers
- ✓ Cloud Managed by Think IT
- ✓ Designed to work alongside other Antivirus solutions for a more secure system
- ✓ Remediates suspicious activity and cleans up an infected machines with ease
- ✓ Proactively protect against modern zero-day attacks and ransomware outbreaks
- ✓ Comprehensive and up-to-date threat telemetry
- ✓ Intelligence and behavioural based layers

## 7 Security Layers

### Web Protection

Prevents access to malicious websites, ad networks, scammer networks, and bad neighbourhoods.

### Application Hardening

Reduces vulnerability exploit surface and proactively detects fingerprinting attempts used by advanced attacks.

### Exploit Mitigation

Proactively detects and blocks attempts to abuse vulnerabilities and remotely execute code on the endpoint.

### Application Behaviour Protection

Prevents applications from being leveraged to infect the endpoint.

### Anomaly Detection

Proactively identifies viruses and malware through machine learning techniques.

### Payload Analysis

Identifies entire families of known and relevant malware with heuristic and behavioural rules.

### Ransomware Mitigation

Detects and blocks ransomware via behavioural monitoring technology

### Plus

A breach remediation engine, recognised as the global standard for automated remediation.
